Abralon, 4000er Körnung

Silicon carbide based sanding pad consisting of a sanding pad, foam centre and Velcro® backing for sanding spraying defects, paint blendings, scratches and coarse sanding (eg with 2000 Abralon) on paintwork, etc. The net structure means that water and air can move freely around the abrasive grains, which means that practically dust-free sanding is possible. The treated surfaces can be polished to a high gloss with the polishing compounds.

Recommendations for use
